Academic Program and Course Description Guide

2025

Introduction:

The educational program is a coordinated and organized package of courses that include procedures and experiences organized in the form of academic vocabulary whose main purpose is to build and refine the skills of graduates, making them qualified to meet the requirements of the labor market, which is reviewed and evaluated annually through internal or external audit procedures and programs such as the external examiner program.

The description of the academic program provides a brief summary of the main features of the program and its courses, indicating the skills that are being worked on to acquire for students based on the objectives of the academic program, and the importance of this description is evident because it represents the cornerstone in obtaining program accreditation and is written jointly by the teaching staff under the supervision of the scientific committees in the scientific departments.

This guide includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the developments and developments of the educational system in Iraq, which includes a description of the academic program in its modern form (Bologna track and course system) system.

In this regard, we can only emphasize the importance of writing a description of academic programs and courses to ensure the proper functioning of the educational process.

Concepts and terminology:

<u>Academic Program Description: The description of the</u> academic program provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, proving whether he has made the most of the available learning opportunities. It is derived from the description of the program.

<u>Program Vision: An</u> ambitious picture for the future of the academic program to be a sophisticated, inspiring, stimulating, realistic and applicable program.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure</u>: All courses / subjects included in the academic program according to the approved learning system (courses) system, whether it is a requirement (ministry, university, college and scientific department) with the number of study units.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by the student after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty member to develop the student's teaching and learning, and they are plans that are followed to reach the learning goals. That is, describe all classroom and extracurricular activities to achieve the learning outcomes of the program. Academic Program Description Form

1. **Program Vision**

We look forward to preparing graduates in the field of financial and banking technologies to work in government departments and benefit from specialization in the practical and applied field.

2. **Program Mission**

Work on preparing and graduating leading scientific and leadership competencies in the field of financial and banking technologies and in developing the knowledge balance in the field of scientific research in the field of banking management to serve the local, regional and international community, as well as training and refining students' minds scientifically and cognitively, emphasizing social and cultural values and responding to the requirements of the local market.

3. **Program Objectives**

financial management and bank management in (institutions and companies) that are p	ort
	an
of economic, financial, accounting and administrative sciences in order to keep pace w	ith
the most important global developments in this field.	

- 2. Guiding the student scientifically based on analysis, interpretation and search for causes and results that the student has the ability to be creative in interpreting.
- 3. Effective contribution with other administrative and accounting sciences in addressing the problems facing the individual and society
- 4. Guiding the student scientifically in line with the progress and development in the field of modern financial and banking technologies.
- 5. Provide them with the methods and skills that enable them to deal with workers in those organizations.
- 6. Enable the student to understand how to optimize the investment of natural and human resources.

4. **Program Accreditation**
